IN MEMORY

From 1973 through 1989, West Virginia has had the distinction of being the state with the lowest crime rate in the nation.

The entire law enforcement community and the citizens of the West Virginia should be applauded for the cooperative effort which made this distinction a reality. The 1989 edition of "Crime in West Virginia" is dedicated to those law enforcement officers who have paid the supreme sacrifice in the protection of their communities. The following is a list of all West Virginia officers feloniously killed in the line of duty since 1972.

GASTON CAPERTON
GOVERNOR

GREETINGS FROM THE GOVERNOR

We all feel the effects of crime; either directly or indirectly. Although West Virginia has been fortunate enough to enjoy the lowest crime rate nationwide for many consecutive years, the impact of crime still influences our way of life.

With the aid of the statistics presented in this publication, Crime in West Virginia, the law enforcement community and the general public alike can be made aware of West Virginia's total crime picture and knowledgeably direct our efforts to combat crime.

Just as the fight against crime requires the cooperation of all citizens, the compiling of the comprehensive and accurate data in this annual requires the cooperation of all contributing law enforcement agencies. The concerted effort of the agencies is greatly appreciated.

With the diligence and dedication of all citizens and law enforcement officers, West Virginia will continue to have a criminal justice system that operates in a positive manner and its population may continue to enjoy life with only a minimal impact from crime.

Sincerely,

Gaston Caperton

**The Honorable Gaston Caperton
Governor of West Virginia
State Capitol Building
Charleston, West Virginia 25305**

Dear Governor Caperton:

Pursuant to Chapter 15, Article 2, Section 24 of the code of West Virginia, I proudly submit the eighteenth annual report on Crime in West Virginia.

The report is a summary for the year 1989 of the monthly statistics compiled by 239 state, county, municipal and DNR law enforcement agencies within the state. These statistics enable law enforcement agencies to define crime trends and identify the extent, type and location of present criminal activity. In addition to these agencies, legislators, municipal and county planners, the media, sociologists and other members of the criminal justice community utilize these figures in research and planning activities.

West Virginia's low crime rate is an encouraging social indicator of the high quality of life available within this state.

A comprehensive and reliable report would not be possible without the cooperation of all West Virginia law enforcement agencies in submitting accurate, complete and timely reports. We commend their diligence.

Sincerely yours,

A handwritten signature in cursive script, appearing to read "J. R. Buckalew".

INTRODUCTION

The West Virginia Uniform Crime Reporting (UCR) Program is a uniform, statewide method of collecting statistical crime data, under the direction of the Uniform Crime Reporting Section of the Criminal Identification Bureau, West Virginia Department of Public Safety. Its purpose is two-fold:

1. To provide a consolidated annual report concerning crime in West Virginia, and
2. To report state-wide crime statistics from a single agency to the Federal Bureau of Investigation

National Uniform Crime Reporting Program

The counterpart of all state-wide UCR programs is the National UCR Program under the direction of the Federal Bureau of Investigation. This National program was the result of a need for nation-wide uniform compilation of crime statistics. Uniform Crime Reports were first collected in 1930 after being developed by a committee of the International Association of Chiefs of Police. Today the IACP continues to serve in an advisory capacity to the FBI in its operation of the UCR program.

In the last several years, the FBI has been actively assisting individual states in the development of state-wide programs for the collection of law enforcement statistics. Although individual UCR programs may vary from state to state, all state programs must be compatible with the National UCR Program. Presently there are 47 operational state or territorial-level UCR Programs. Crime statistics submitted by individual law enforcement agencies from all fifty (50) states, whether reported through state-level UCR programs or directly to the FBI, are presented annually in the FBI's Uniform Crime Reports publication, **Crime in the United States**.

West Virginia Uniform Crime Reporting Program

Taking advantage of the invaluable assistance provided, West Virginia developed its own state-wide program for collection of law enforcement statistics.

Purpose and Objectives

The fundamental objectives of the West Virginia UCR Program are:

1. Inform the Governor, Legislature, other government officials, and the public as to the nature of the crime problem in West Virginia, its magnitude and its trends.
2. Provide the FBI with complete crime data to be included in the National crime reports.
3. Provide law enforcement administrators with the best possible data available to help combat individual crime problem areas.
4. Determine who commits crimes by age, sex, race and ethnic origin and by other attributes in order to find the proper focus for crime prevention and enforcement.
5. Provide base data and statistics to measure the workload and effectiveness of West Virginia's Criminal Justice System, to measure the effect of prevention and deterrence programs, and to assist in the assessment of social and other causes of crime for the development of theories on criminal behavior.

Development

The West Virginia Legislature, in the Criminal Identification Bureau Act of 1971, established the Uniform Crime Reporting Statute.

**Criminal Identification Bureau Act of 1971
Chapter 15, Article 2, Section 24, Sub-Section I**

(i) All state, county and municipal law enforcement agencies shall submit to the bureau uniform crime reports setting forth their activities in connection with law enforcement. It shall be the duty of the bureau to adopt and promulgate rules and regulations prescribing the forms, general content, time and manner of submission of such Uniform Crime Reports. Willful or repeated failure by any state, county or municipal law enforcement official to submit the Uniform Crime reports as required in this article shall constitute neglect of duty in public office. The Bureau shall correlate the reports submitted to it and shall compile and submit to the governor and the legislature semi-annual reports based on such reports. A copy of such reports shall be furnished to all prosecuting attorneys and law enforcement agencies.

The responsibility and authority for collection and dissemination of UCR data was given to the West Virginia Department of Public Safety (State Police). This program became operational January 1, 1972.

Reporting Procedure

Under the West Virginia UCR Statute, law enforcement agencies are required to submit specified Uniform Crime Reports. The necessary information for each of the required reports is gathered from each agency's record of complaints, investigations and arrests. Offenses are recorded by the municipality and county in which they occur. Municipal law enforcement agencies report those crimes which occur within the cities, and county sheriff's departments and state police report those crimes which occur within the counties but outside of the cities.

Individual agencies are required to submit uniform crime reports on a monthly basis. Law enforcement agencies report the number of offenses reported to them in the following Part I crime categories:

- (1) Criminal Homicide
- (2) Forcible Rape
- (3) Robbery
- (4) Felonious Assault
- (5) Breaking and Entering
- (6) Larceny/Theft
- (7) Motor Vehicle Theft

(Arson became the eighth crime index offense in 1979, however, these statistics are collected in a supplemental form and are shown separately.)

In addition, law enforcement agencies report on a monthly basis supplemental offense information such as the value of property stolen and recovered, the circumstances surrounding homicides and rapes, the age, sex, and race of all persons arrested, and police disposition of juveniles. Police employee data is collected on an annual basis. Information on Domestic Violence is collected on a monthly basis in accordance with the state code 48-2A-9 and the subsequent information summarizes family and household abuse in this state. As of April, 1988, law enforcement agencies began to report to this office a Monthly Controlled Substance Report, which provides information on the quantity and type of drugs purchased or confiscated by law enforcement in West Virginia, as well as the estimated street value of these drugs. This data is included in this edition of **Crime in West Virginia**.

Verification Process

An obvious concern in the collection of crime statistics from law enforcement agencies throughout the state is the uniformity and accuracy of data received. All law enforcement agencies are furnished with the Uniform Crime Reporting Handbook which outlines in detail the proper procedures for scoring and classifying offenses. However, program aides such as guides and instructions do not necessarily guarantee the accuracy and correctness of the reports submitted by the agencies. Additional controls therefore are necessary.

Each report received by the UCR Section is recorded, examined and verified for mathematical accuracy, and possibly more important, reasonableness. The elimination of duplication of reporting by agencies receives particular attention. Checks are built into the data processing of the reports to further ensure their validity and accuracy. The UCR Program, however, is still affected to some degree by problems such as incorrect reports, incomplete records, misinterpreted data and human error, as are all statistical programs. In addition, it should be pointed out that there is no way of determining the actual total number of crimes which are committed. Many criminal acts occur which are not reported to official sources. It is for this reason the Uniform Crime Reporting Program focuses its attention in the offenses which are reported to law enforcement agencies.

In spite of these and other shortcomings, the Uniform Crime Reporting Program still provides the best information available concerning crime in West Virginia.

Population Data

The computation of crime rates as they appear in this report by municipality, county and state is based on 1969 population data provided by the Federal Bureau of Investigation through the cooperation and assistance of the United States Bureau of Census.

Crime Index

The tabulations presented in the tables, graphs, and charts in this publication indicate the volume and distribution of crime in West Virginia on the basis of a Crime Index. The crime figures are broken down by municipal, county, regional and state totals.

The Uniform Crime Reporting Program utilizes seven crime classifications—Murder, Forcible Rape, Robbery, Felonious Assault, Breaking & Entering, Larceny/Theft and Motor Vehicle Theft—to establish an index to measure the trend and distribution of crime in the United States. These crimes are counted by law enforcement agencies as they become known to them. These crimes were selected as they represent the most common local crime problems. They are defined as all serious crimes either by their nature or by the volume in which they occur. The crimes, Murder, Forcible Rape, Robbery and Felonious Assault, are categorized as Violent Crime. The crimes Breaking & Entering, Larceny/Theft and Motor Vehicle Theft, are classified as Non-Violent Crimes.

The monthly and annual Uniform Reports received in 1969 from 239 municipal, county and state law enforcement agencies in West Virginia represent 100% of the estimated West Virginia population. The rural population is served by both the state police and sheriff's departments and the crime rate is computed for the rural population rather than for the agency, however, the number of offenses and percent of offenses cleared is listed separately for each agency.

This report provides police executives with a yardstick with which to measure local crime problems. To use this report as an administrative tool, data must be converted to percentages and rates. The most used of crime statistics is the Crime Index Rate which refers to the number of Crime Index Offenses per 100,000 population. Due to the fact that no city in the state has a population over 100,000, calculations for each individual contributing agency are based on the number of offenses per 1,000 persons.

For Uniform Crime Reporting purposes, a Crime Index Offense is cleared when the case has been solved either by arrest or by exceptional clearance.

CLASSIFICATION OF OFFENSES

Uniformity in reporting under the West Virginia System is based upon the proper classification of offenses by police.

The adoption of the Federal System of Uniform Crime Reporting included the utilization of the offense classifications of that system. Law enforcement in this state has made accurate application of those classifications in the reports submitted to the West Virginia Uniform Crime Reporting System.

In view of the need for compatibility with the federal system, "offenses" under the program are not distinguished by designation of "high misdemeanors," "misdemeanors," or violations of municipal ordinances. The explanations of offense classifications may vary slightly with those employed at the federal level because the language used is that familiar to law enforcement in this state. However, the major categories of offense classification remain the same as those employed on the national level.

Part I Offenses

Offense data consists of information that has been extracted from reports of Part I crimes that have come to the attention of West Virginia law enforcement agencies. PROFILE STATE OF WEST VIRGINIA

West Virginia, truly deserving of its nickname "Mountain State," possesses an abundance of resources — natural, educational and recreational — for its citizens and for visitors to this fine state.

Bordered by the states of Pennsylvania, Maryland, Ohio, Kentucky and Virginia, West Virginia is located between the large population centers of the East and Midwest. Four principal Metropolitan market areas — New York, Chicago, Philadelphia and Detroit — are within a 500 mile radius of the state.

Comprised of 55 counties, with a population in 1989 of 1,857,000 and a density of 76.5 persons per square mile, West Virginia is primarily a rural state. Known best as one of the major coal producing states, West Virginia continues to move to the forefront in terms of energy production, research, and development. In addition to an increased emphasis on coal, natural gas liquids and petroleum continue to be important mineral resources. In the Ohio and Kanawha River Valleys, the chemical industry has become a major economic force in the state. Add to these other resources such as metals and high quality timber from our vast woodlands, and it becomes obvious that West Virginia's economy is quite diverse.

Two areas of improvement West Virginians are quite proud of are in education and in recreation. Advancements in education include three medical schools, an excellent law school, a greatly expanded statewide College of Graduate Studies, as well as many new elementary, secondary, vocational and technical schools throughout the state.

In the area of recreation, West Virginia is a state with an exceptional outdoor recreation base. Its varied topography, climate and resources give it the potential of being a year-round recreation land serving the people of the Eastern United States. With its fine fishing streams, picturesque mountains and abundant forest areas, West Virginia's state parks and forests continue to attract visitors in ever-growing numbers. Skiing has become a very popular winter activity with the State having 5 major ski resorts to offer people in the Eastern U.S.

This profile is presented to help the reader gain a better understanding of the state of West Virginia.

CRIME FACTORS

Statistics gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of West Virginia and project a state-wide view of crime. Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime-influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern and the police are limited in their role to its suppression and detection. As stated by the President's Commission on Law Enforcement and Administration of Criminal Justice in their report "The Challenge of Crime In A Free Society" (1967-Page 92):

"But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the criminal justice system; the criminal justice system is only one part of the government; and the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time."

Set forth below are some of the conditions which will, by type and volume, affect the crime that occurs from place to place:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with reference particularly to age, sex, race and ethnic origin.

Economic status of the population.

Relative stability of the population, including commuters, seasonal, and other transient types.

Climate, including seasonal weather conditions.

Educational, recreational, and religious characteristics.

Standards governing appointments to the police force.

Policies of the prosecuting officials and the courts.

Attitude of the public toward law enforcement problems.

The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

DEFINITION

Murder is defined as the unlawful killing of a human being with malice aforethought. Any death due to a fight, argument, quarrel, assault, or commission of a crime is included. This index offense is scored by police on the basis of their investigation without regard as to the findings of a court or jury or the decision of a prosecutor. Attempts to kill and assault to kill are scored as felonious assaults and not as murder. FORCIBLE RAPE

DEFINITION

Forcible Rape is the carnal knowledge of a female forcibly and against her will. For the purpose of Uniform Crime Reporting, rape is divided into two categories: (1) Rape by Force; and (2) Attempted Rape. Carnal abuse without force (statutory rape) and other sex offenses are not included.

Forcible Rape differs from other violent crimes in that the victim in many cases, is hesitant in reporting the offense to police. The rigors of court procedures, embarrassment and fear of any accompanying stigma have a deterrent effect on the victim's willingness to make the crime known to police. The presence of a prior relationship between victim and perpetrator makes the determination of the act of force difficult to establish, and the usual clandestine nature of the offense presents a problem in verification.

ROBBERY

DEFINITION

Robbery is defined as the felonious and forcible taking of the property of another against their will by violence or by putting them in fear. The element of personal confrontation is always present in this crime. Under the Uniform Crime Reporting Program, all assaults or attempts to rob are included. Robberies are reported in four general categories - gun; knife or cutting instrument; hands, fists, feet, etc.; and other dangerous weapons. As a general rule, robbery differs from larceny in that it is aggravated by the element of force or the threat of force.

Robbery, as a crime of violence, has a serious impact on the victim. In many instances, serious injury results. Oftentime, along with physical injury or without, the victim suffers mental disturbance. Such damage is immeasurable. This is emphasized when the attempt to rob results in the death of the victim. Of course, in this case, the robbery would not be scored since the more serious offense, murder, would be reported and the robbery would serve as the motive. The placing of a dollar value, however, on the damage resulting from this type of offense is an attempt to measure that which is immeasurable.

ROBBERY SUMMARY

FELONIOUS ASSAULT

DEFINITION

Felonious Assault, as defined under the West Virginia Uniform Crime Reporting Program, is an attempt or offer with unlawful force or violence, to do serious physical injury to another. Attempts are included since it is not necessary that any injury result when a gun, knife or other weapon is used which would result in serious physical injury if the crime were successfully completed.

The use or attempted use of a dangerous weapon in an assault or the serious injury inflicted by hands, fists, or feet separates this offense from those assaults categorized as "simple" and not felonious in nature.

The victim of an actual assault of this type may suffer serious injury or permanent disability and all assaults to kill and attempts to kill are recorded in this area. As with murder, the use of weapons to inflict these injuries make this offense a subject for analysis.

FELONIOUS ASSAULT SUMMARY

BREAKING AND ENTERING

DEFINITION

Under this Program, Breaking and Entering is defined as an unlawful entry or attempted forcible entry of any structure to commit a felony or larceny.

Data collection for this offense is further categorized as to forcible entries, unlawful entries where no force is used, and attempted entries.

As with other non-violent crimes, the motive of personal gain coupled with the element of opportunity, results in the commission of this offense by both the amateur and the professional perpetrator. Only the absence of confrontation and the use of force separate this crime from Robbery of the violent crime group. However, detection during commission many times results in confrontation of the victim by the perpetrator demonstrating why this offense is considered the most serious of the non-violent crime group.

The volume of this offense presents the police with a serious enforcement problem made more difficult in many areas by the lack of sufficient personnel to act as a deterrent and to provide successful solutions to these crimes.

BREAKING AND ENTERING SUMMARY 1989

A total of 11,636 Breaking and Entering offenses were reported for 1989.

Breaking and Entering comprised 28.3 percent of the total for the Non-Violent Crime category and 26.5 percent of the total Crime Index Offenses.

August recorded the highest number of Breaking and Enterings with 1,076 offenses.

There were 626.6 Breaking and Enterings per 100,000 population in West Virginia.

Breaking and Enterings of residences accounted for 6,743 of the total offenses; 6,013 of the total offenses were at night.

The total dollar value for Breaking and Entering offenses was \$9,497,848, an average of \$816 for each offense.

A total of 1,842 Breaking and Entering were cleared by arrest or exceptional clearance, a clearance rate of 15.8 percent. Adults were involved in 1,347 of the clearances.

There were 1,906 persons arrested for Breaking and Entering offenses; 1,785 of those arrested were males, 677 were under 18, and 1,090 were white.

LARCENY/THEFT

DEFINITION

Larceny/Theft is the unlawful taking or stealing of articles of value without the use of force, violence, or fraud. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from autos, and the theft of auto parts and accessories. Motor Vehicle Theft is excluded from this category for crime reporting purposes, inasmuch as it is a separate Crime Index Offense.

Larceny offenses cleared by police are dramatically affected by the nature of the crime. As with other Non-Violent Crimes, opportunity and stealth, working in favor of the perpetrator and against police detection, reduce solutions for this offense.

As with other offenses against property, Larceny is primarily a crime of opportunity. Types of Larceny will differ in volume depending upon the opportunity for theft offered in a given area.

When average value is applied to the reported crimes in this category, the dollar loss to victims was \$402. It is true that a portion of goods stolen was recovered and returned to the victims, but the relatively low percentage of crimes cleared by arrest, and the lack of specific identification characteristics on such property indicates these recoveries will not materially reduce the overall loss. In addition, many offenses in this category, particularly where the value of goods, never come to police attention.

LARCENY-THEFT SUMMARY

1989

A total of 26,606 Larceny/Theft offenses were reported for 1989.

Larceny/Theft comprised 64.6 percent of the total for the Non-Violent Crime category and 60.6 percent of the total Crime Index Offenses.

July recorded the highest number of Larceny/Thefts with 2,450 offenses.

There were 1432.7 Larceny/Thefts per 100,000 population in West Virginia.

Larceny/Thefts from automobiles accounted for 6,891 (25.9%) of the total offenses.

The total dollar value for Larceny/Theft offenses was \$10,688,386, an average of \$402 for each offense; of the total offenses 9,458 were \$200 and over in value.

A total of 5,949 Larceny/Thefts were cleared by arrest or exceptional clearance, a clearance rate of 22.4 percent. Adults were involved in 4,677 of the clearances.

There were 6,498 persons arrested for Larceny/Theft offenses; 4,559 of those arrested were males, 1,495 were under 18, and 5,609 were white.

WEST VIRGINIA ARREST DATA 1989

WEST VIRGINIA ARREST INFORMATION

The West Virginia Uniform Reporting Crime Reporting Program requires the monthly reporting of data concerning persons arrested in the state. A record of total arrest activity for criminal acts in both Part I and Part II crime classes is received from 239 county, state and municipal law enforcement agencies and is analyzed and arranged according to age, sex and ethnic origin of persons arrested. Traffic arrests, except Driving While Intoxicated, are not reported. A total of 61,994 arrests for Part I and Part II criminal offenses were reported during 1989. This was an increase of 2,791 arrested over the 1988 figure of 59,203. Based on population estimates, there was a statewide arrest rate of 32.85 arrests per 1,000 persons in West Virginia. The arrest rate in 1988 was 31.38.

Since 1988 the number of persons arrested for Part I and Part II offenses has increased 4.7 percent while the arrest rate has increased 4.7 percent.

A person is counted on the monthly arrest report each time he or she is arrested or summoned. It should be kept in mind that the volume of arrests may vary from time to time due to the differences in local arrest procedures and policies. It should be noted that a person may be arrested several times during a given month for the same or different offenses. This occurs frequently for such crimes as drunkenness, disorderly conduct and similar offenses. A juvenile is counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would be counted or when police or other official action beyond a mere interview, warning or admonishment is given.

These arrest figures do not indicate the actual number of individual persons arrested or summoned since, as has been pointed out, one person may be arrested several times during the month. However, arrest information is useful in measuring the extent of law enforcement activity in a given geographical area as well as providing an index for measuring the involvement in criminal acts by the age, sex, race and ethnic origin of the perpetrators.

Of all reported arrests for 1989, 16.9 percent were for Part I Offenses (Murder, Forcible Rape, Robbery, Felonious Assault, Breaking & Entering, Larceny/Theft and Motor Vehicle Theft). Analysis of Part I arrests indicates that Larceny, as in the past years comprised the highest percentage of all arrests of Part I crimes with 62.0 percent. The "Drunkenness" category comprised 19.7 percent of the total arrests for Part II Offenses. This represented an increase of 0.3 percent over 1988. There were 10,157 arrests for drunkenness in 1989 compared with 9,582 in 1988, up 6.0%

Juveniles were involved in 10.6 percent of the arrests for 1989, compared to 10.2 in 1988. Female arrests were up 4.5 percent from 11,154 arrests in 1988 to 11,659 arrests in 1989.

Arrests by race show that 90.1 percent of the persons arrested were White while 9.7 were Black.

VIOLENT CRIME

Arrests for crimes of violence (Murder, Rape, Robbery and Felonious Assault) on a statewide basis accounted for 14.6 percent of all arrests for Part I and 2.5 percent of the total arrests for all offenses. A further evaluation indicates that arrests for Felonious Assault were the most frequent, representing 61.7 percent of the total arrests for violent crimes, down from 62.3% during 1988.

PROPERTY CRIME

Property crime arrests (Breaking and Entering, Larceny/Theft and Motor Vehicle Theft) comprised 85.3 percent of all arrests for Part I offenses and 14.4 percent of all arrests.

The highest percentage of property crime arrests, 72.7 percent, occurred in the Larceny/Theft category. Larceny/Theft arrests increased 8.1 percent, from 6,013 in 1988 to 6,498 in 1989.

NARCOTIC DRUG LAW ARRESTS

Information concerning arrests for narcotic drug arrests is collected and analyzed according to specific drug categories. During 1989, a total of 1,626 arrests were made for narcotic drug law violations, a increase of 43.9 percent over 1988. Analysis of individual drug categories showed that the highest percentage of arrests, 38.9 percent, involved possession of marijuana. The lowest percentage of arrests occurred in the sale and manufacture of "other dangerous drugs", amounting to 1.0 percent. Further analysis shows that the arrests for sale/manufacturing of drugs accounted for 50.4 percent and the arrests for possession of drugs represented 49.6 percent.

GAMBLING ARRESTS

Arrests for gambling offenses during 1989 amounted to 0.1 percent of all reported arrests for Part I and Part II offenses. Of those arrested for gambling, 96.6 percent were males. The highest percentage of arrests for gambling offenses, 22.0 percent, occurred in the 30-34 age categories. A total of 59 gambling arrests were reported during 1989, an increase of 51.3 percent from the 1988 figure.

LAW ENFORCEMENT EMPLOYEE DATA

1989

The Uniform Crime Reporting Program in West Virginia incorporates the collection of pertinent data relating to law enforcement entities of the state. Information regarding West Virginia law enforcement manpower, distribution, assaults against law enforcement officers, and the number of and circumstances surrounding the killing of law enforcement officers are discussed in this section.

This information is submitted monthly by municipal, county and state law enforcement agencies and is published on a semi-annual basis. Specific information concerning the number of law enforcement employees reflects the status as of October 31, 1989 and is limited to municipal, county and state law enforcement agencies currently reporting to the West Virginia UCR Program.

The determination of police manpower for any given area or municipality should be a subject of serious consideration. Such consideration, however, should be based on the numerous factors which create the need for police services. Some of these factors, discussed elsewhere in this publication relate to size, density of population, geographic location, character and proximity to metropolitan areas. The information in this section relates to reported law enforcement strength and should not be interpreted as recommended strength for any given entity. Such determinations should be made after objectively evaluating the need for police services based on the above factors.

The personnel of each law enforcement agency differ as to the demands and responsibilities placed before them. Many police officers are fully occupied with clerical tasks and are not free to perform active police duties.

SWORN OFFICERS

In 1989, West Virginia had 2,556 sworn law enforcement personnel, compared to the 1988 figure of 2,585. This is a decrease of 29 officers or 1.1 percent in the number of officers in the state. Rates based solely on sworn personnel show that the state average was 1.4 officers per 1,000 inhabitants. Males comprised 96.8 percent of all sworn personnel, while females comprised 3.2 percent.

STATE POLICE

The West Virginia State Police reported a total of 493 officers. This is an increase of 0.2 percent over last year's figure of 492 officers. The State Police had a rate of 0.4 percent sworn officers per 1,000 inhabitants (rural population only).

MUNICIPAL

Municipal Police Department reported 1,344 sworn officers. A decrease of 1.5 percent over the 1987 figure of 1,364 sworn officers. This is a rate of 2.0 sworn officers for each 1,000 inhabitants (municipal population only).

SHERIFF

County Sheriffs Departments reported a total of 626 sworn officers: a decrease of 1.3 percent over the 1988 figure of 1,364. Based on sworn personnel, this is a rate of 0.5 officers per 1,000 inhabitants (rural population only).

D.N.R.

The Department of Natural Resources reported 92 sworn officers; a decrease of 3.2 percent over the 1988 figure of officers. These figures reflect a rate of 0.08 sworn officers for each 1,000 inhabitants (rural population only).

LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED 1989

The killing of a police officer has an effect on society which reaches far beyond the overt act. Such occurrences constitute an immediate threat to the well being of the community and a serious breach of the internal security of the country. Today, a young person who considers a career in law enforcement must also consider the very strong possibility of being killed or assaulted by a member of the very same society he or she is sworn to protect. This deplorable situation should be a subject of serious public concern, for in truth, an attack on a police officer is an attack on society. The violence directed against law enforcement officers acting in the line of duty is clearly demonstrated by the following summary information:

A total of 190 Assaults on Law Enforcement Officers were reported in 1989, of which 59, or 31.1 percent, resulted in personal injury to the officer.

For every 1,000 arrests, there were 3.1 Assaults, and for each 100 sworn officers there were 7.4 Assaults.

Personal weapons (hands, fists, feet, etc.) were used in 159 of the Assaults.

A total of 188 of the Assaults were cleared, a clearance rate of 98.9 percent.

In 1989, the state was unfortunate enough to suffer from the loss of 2 of its Law Enforcement Officers, who were killed by felonious act while performing their lawful duty
